

COMMUNICATION PRODUCTS THAT EMPOWER **Media Operations**

POLISHED PRODUCTS — DEVELOPED. VALIDATED. DELIVERED.

W R Systems, Ltd. (WR) develops, validates, and delivers polished products with the end user in mind. Our documentation, media, and training solutions are clear, accurate, and organized; and developed according to industry-standard guidelines and established quality procedures.

We are dedicated to designing and deploying innovative, cost-effective life cycle systems engineering solutions worldwide. We do it all: we gather requirements; we design, develop, test and deploy; we document and train; and we provide integrated logistics, maintenance, and repair support. Our capabilities include support of all 12 Integrated Product Support (IPS) elements, including Technical Data and Training and Training Support.

The WR Media Ops Team includes:

- Technical Writers • Digital Platform Experts • Photographers and Videographers
- Content Architects • Graphic Arts • 3D Animators • Drafters

WR Training Solutions. WR Instructional Systems Design (ISD) specialists, classroom trainers, and Subject Matter Experts (SMEs) are ready to deliver on-the-job training (OTJ) and classroom instruction at WR facilities, or at the customer site, shipboard and ashore, locally and internationally. We also offer Computer-Based Training/Web-Based Training (CBT/WBT).

Technical Manual Expertise. WR is fully staffed to provide Technical Manual Maintenance Activity (TMMA) support to Technical Manual Managers (TMM). We develop Interactive Electronic Technical Manuals (IETMs) following the appropriate standards, including the international S1000D specification as well as all relevant military specifications.
